### *Electronic Contract Manufacturing*

Assembly, integration and testing of electronic boards with precision and quality. Outsourcing electronic services (EMS - Electronic Manufacturing Service) brings solid competitive advantages to your business.

# Machine Park

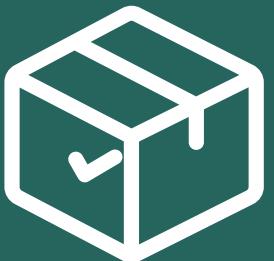

# TURN KEY:

## A COMPLETE PRODUCT MANUFACTURING SOLUTION

In this business model, SERDIA is responsible for:

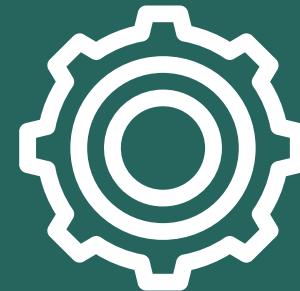

Purchase and  
logistics  
of the components

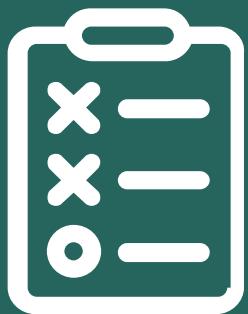

Storage  
of the  
components

Quality assurance  
of the  
components

Assembly of  
product

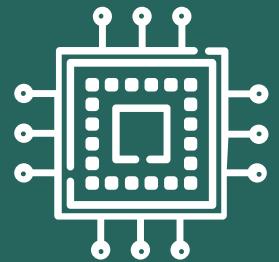

Final Tests and  
Box Build  
Integration

## Other services:

Distributor  
of the products of  
Queclink and  
Tektelic

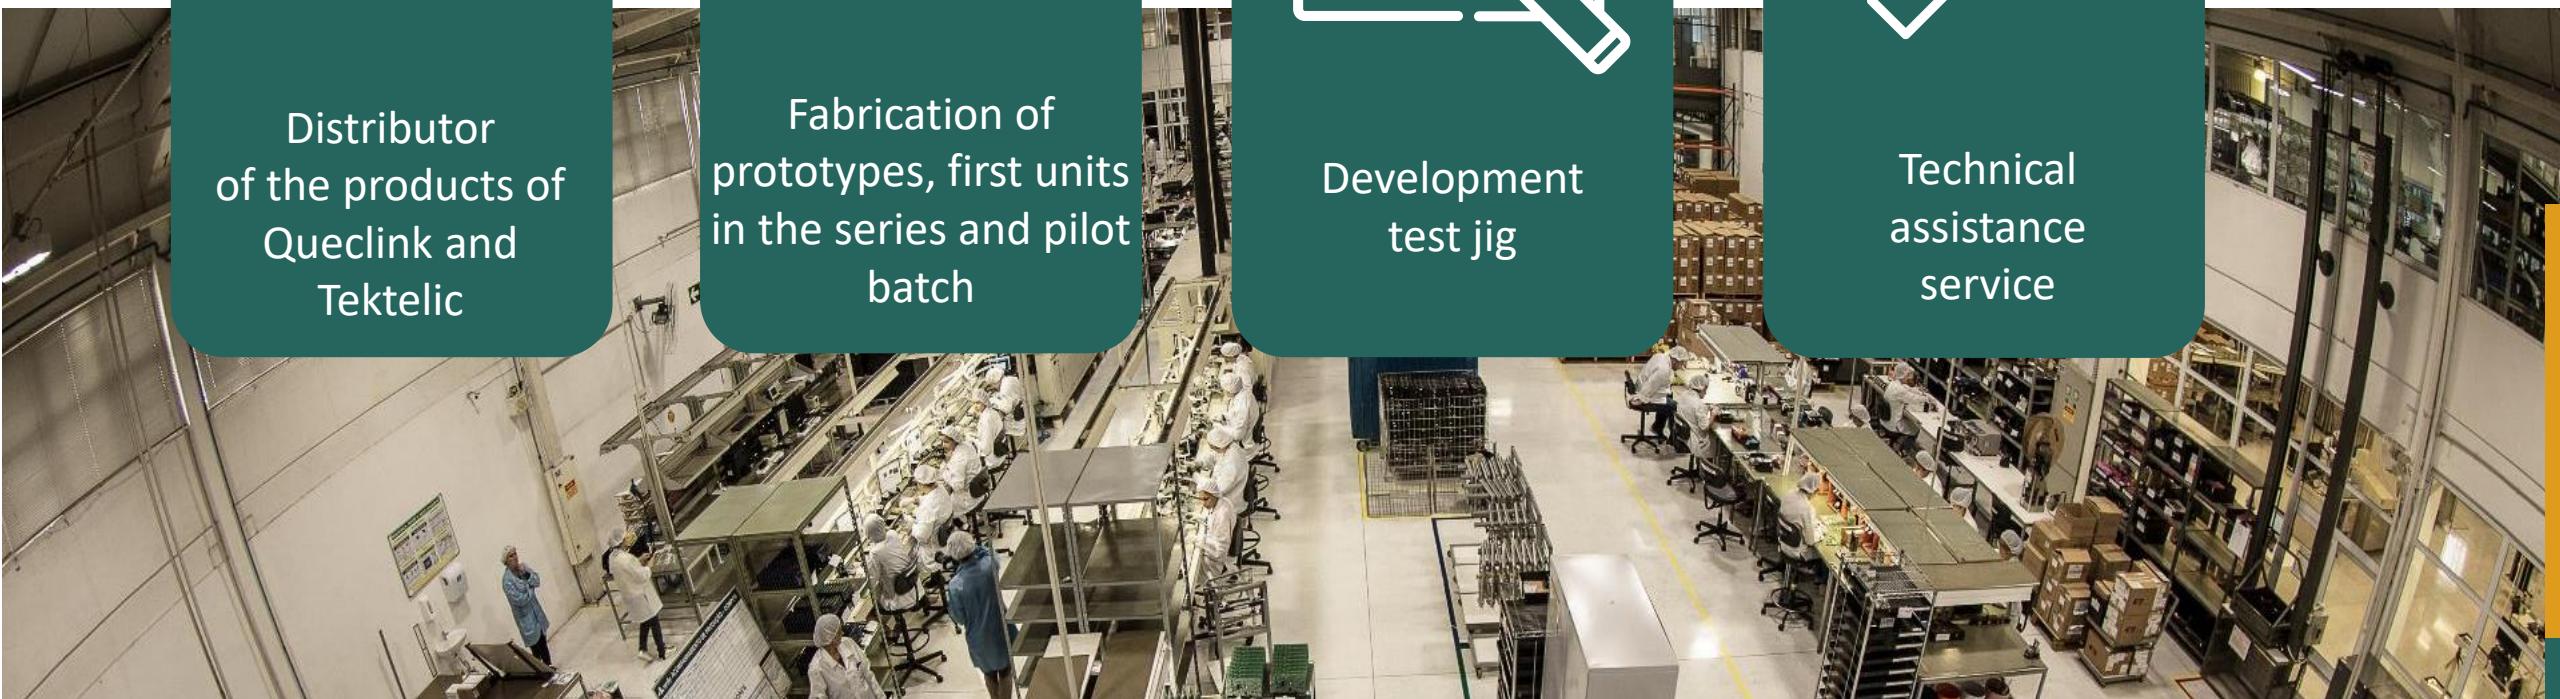

Fabrication of  
prototypes, first units  
in the series and pilot  
batch

Development  
test jig

Technical  
assistance  
service

# Export

We export your product

## Prototypes, NPI and pilot batch

SERDIA understands that the prototype, pilot batch and NPI stages are important and even critical for its customers. Our engineering and quality experts are in constant contact with the customer team to obtain the best results. This personalized treatment guarantees maximum agility in delivery and quality of your product.

## Test Jigs

We design and produce equipment to automate tests

## RMA management

Serdia is able to provide technical assistance to our customers electronic products.

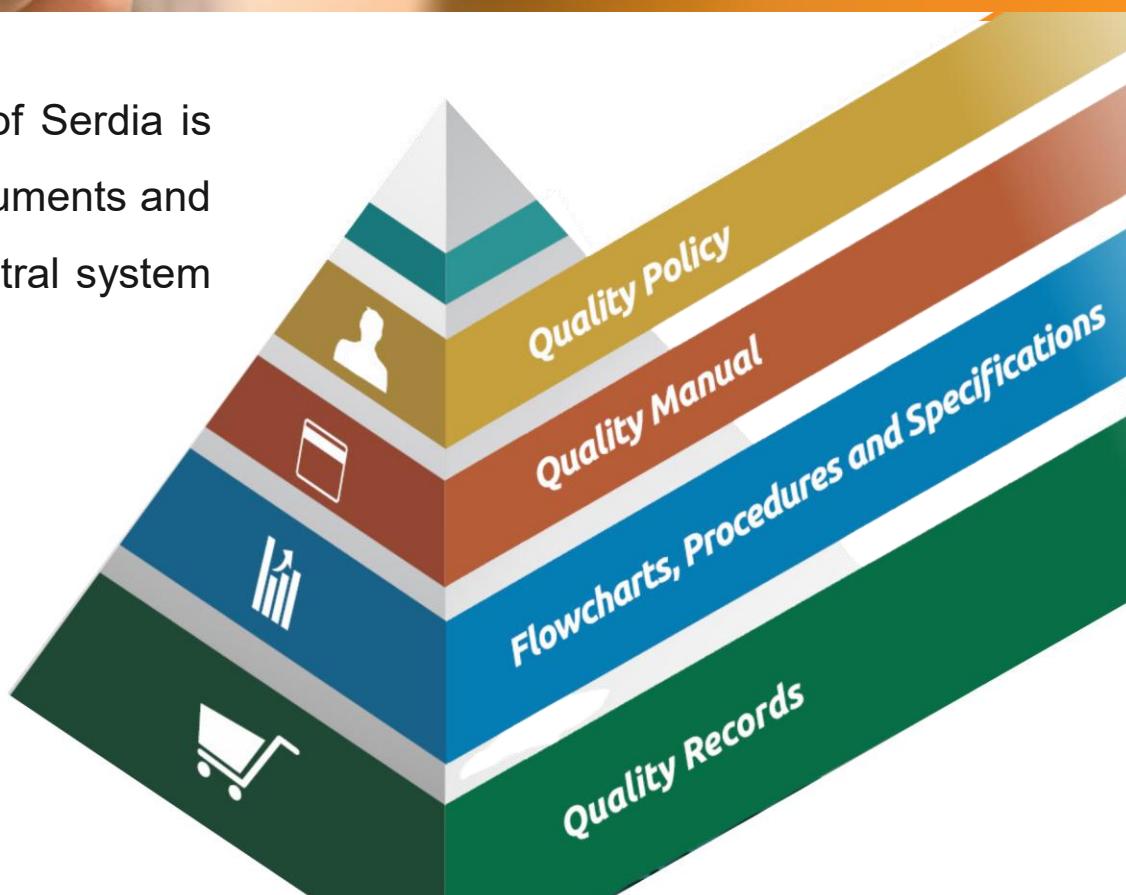

## Description of Quality Control System

**Qualyteam**

The most used quality management software in Brazil

The Quality Control system of Serdia is structural with normative documents and supporting documents of central system control, as shown on the left.

## TECHNOLOGY IN ELECTRICAL AND FUNCTIONAL TESTS

The team is composed of engineers and i-technicians who are specialists in developing jigs for parametrical and functional tests. We also have a state of the art ICT Agilent 3070.

The results obtained in the cards are continuously monitored, producing performance indicators for process control and evaluation.

The word Reliability expresses precisely what the client can expect from Serdia's products and services.

# TEST PROJECT

## Test Solutions According Customer Requirements

Automatic parametrical testing  
IA Developed by Serdia - Visual inspection testing  
Automatic functions testing  
IHM according customer requirement  
Connections by pins  
Automat testing for opens and shorts before FCT  
Automatic firmware recording  
Log tests results

# Certifications

## ISO 9001

Serdia has been certified under the ISO 9001 standard since 1998, demonstrating its commitment to quality and continuous improvement. We were the first electronic manufacturing services (EMS) company in Brazil to achieve certification under the ISO 9001:2015 version, reinforcing our leadership and compliance with international standards.

## ISO 13485

In 2025, Serdia obtained ISO 13485 certification, internationally recognizing the quality and compliance of its healthcare-related processes. This milestone strengthens our credibility as a strategic partner in the development and manufacturing of medical devices.

## EX Certification

Serdia is also certified to work in classified areas (EX certification), ensuring compliance with international safety standards. This qualification proves our technical capability to operate with excellence in environments with explosion risks, such as the oil and gas, mining, and chemical industries.
